# Discover The New Standarts Of TT Defence Lifesaving Products

## WHO ARE WE

TT Defence Co. was born with the futuristic passion of it's founder Tarhan Telli to create high standart defencive technologies. After long period of research and development, building great know-how, TT Defence is producing light, comfortable and user friendly military equipments.

Offering our clients a wide range of design, manufacturing and distribution capabilities in body armours and tactical equipments, for both Turkey and EU markets.

We are significantly focused on sustainable development of armour systems, with the advantage of high standart technology and new generation materials. These solutions are rigorously tested using in the in-house ballistic test range and stab testing apparatus, both of which were approved by the Home Office, CAST (now part of DSTL) to meet the requirements of the Turkey Home Office Body Armour Standards requirements and are also capable of testing to the NIJ, German, Swiss and other international standards. All products including body armour, ballistic helmets, shields, blankets and rifle plates are manufactured under strict ISO 9001:2015 certification.

Contact us to learn more about products, distribution and sales available in TURKIYE and other locations outside the TURKIYE.

TT DEFENCE

**Concealable Ballistic Vest**

## Military Camouflage

Military camouflage is used by the armed forces to protect personnel and equipment from the observation of enemy forces.

It is a type of military deception and is frequently used in military tactics.

Practically; means applying colors and materials to all types of military equipment, including vehicles, ships, aircraft, weapon positions, and combat uniform.

Stealth technology has been created to make air combat vehicles, ships, submarines, missiles, satellites and the military less visible to the enemy.

# Military Fabrics Patterns

Military tent is a must-have equipment for military personnel going camping. The purpose of the tent is a shelter that protects the soldiers. For this reason, it is one of the first elements that come to mind among military equipment. Since military tents serve as a shelter, they provide the advantage of being folded and mounted anywhere. Military tents are highly effective equipment for protecting soldiers from thorny terrain, rain, wind, snow, rising temperatures or insects.

# Military Bags

The military bag is a special tactical bag inspired by the armed forces. It is extremely robust to allow you to efficiently organize and compartmentalize all your equipment.
